Aim of the course

The purpose of the day is to explore how a knowledge of anatomy and function the axial skeleton and its associated structures is related to movement in the horse. It is only with a good knowledge of the normal structure and biomechanics that the abnormal, injured and pathological can be assessed and corrected. The course will be delivered with both lectures and demonstrations. The morning will cover the axial skeleton, joints and the anatomy of the neck with the afternoon focusing on the role of the neck and axial skeleton during in hand exercises and on a circle. The sessions will be interactive with discussion welcomed throughout.

Course leaders

Dr Sue Kempson – Retired lecturer in Veterinary Anatomy from the Royal (Dick) School of Veterinary studies with a lifelong interest in the relationship of structure and movement of the horse.

Mrs Catherine Marshall – Owner of Whitesands Equestrian, a small training and livery yard. Catherine is the only level 2 qualified instructor of the school of Leegerete. She spends much of her time rehabilitating horses that have been incorrectly trained and have broken down both physically and mentally.
